7. Strategic Answers to Key Mentor Inquiries

Q1: Can we use the same kit designs in shared studio classes as giveaway kits?

YES, 100%! The exact same 40 kit models from Butterfly Edufields, Practiko, Kiddale, Robocraze, and Mindtronix are used for both approaches. In **Approach 1 (Shared Lab)**, you order 3 units per kit (120 units total = ₹75K–₹80K). In **Approach 2 (Take-Home)**, you order 30 units of the 10 Giveaway kits (600 units total), funded entirely by monthly student tuition collections.

Q2: What is the Experiential Corner Budget?

Based directly on the End of September Roadmap, the Experiential Corner budget is **₹30,000 Total** (Junior Corner: ₹12,000 + Senior Corner: ₹18,000), covering the 5 interactive stations (RC Games, Science Labs, Drone Zone, Engineering Challenges, and Maker DIY Stations).

Q3: Do assessment classes require extra kit purchases?

NO! Classes 6, 12, 18, and 24 are gamified challenge missions where students reuse the vendor kits they already built in preceding classes. Zero extra kit cost — only ~₹100–₹200 in printed targets, scoring sheets, and badge stickers covered by the ₹8,000 buffer.
